COMPUTER SYSTEM AND METHOD FOR SECURE ACCESS CONTROL OF AN ONLINE FORM PAGE

Abstract

The present disclosure relates to a system (100) and method (400) for secure access control of an online form page. The method (400) comprises: receiving (402) an access request sent by a browser application; receiving (404) browser data associated with the browser application; verifying (406) the browser data; authorizing (412) or denying (410) the access request based on verification of the browser data; sending (414) the online form page upon authorization of the access request for filling a form; receiving (416) a submission request to submit the filled form; receiving (418) temporal data associated with filling of the form; verifying (420) the temporal data; authorizing (426) or denying (424) the submission request based on verification of the temporal data; and submitting (428) the filled form for further processing upon authorization of the submission request.
