(54) Title: HARNESS FOR STRETCHING THE PENIS

(57) Abstract: A harness for generating an elongation of the penis comprises a belt (1), adapted to be worn around one's waist, connected at the rear portion via small rotating snap-hooks with two inextensible cinching straps (8,15), said straps each having a pair of half-rings (9,16) for length adjustment. One said strap (8) on lower end carrying adjustable rope loop (13) to be placed around penis base. Second said strap (15) on lower end is connected via L-shaped connecting member (17) with flexible adjustable loop (19) being encircled and tightened around penis next to the penis head. Penis stretching force is easily and quickly managed by tightening or loosening said straps, even while walking and even over the clothing.
