
601
configuration information transmitted by a base station is received
602
a power control parameter of one or more TRPs corresponding to at least one carrier transmitted by the base station is received
603
a trigger condition for PHR reporting corresponding to one or more TRPs transmitted by the base station is received
604
determining whether the UE satisfies the trigger condition for reporting based on the power control parameter and the trigger condition for reporting
Y
605
one TRP is selected from multiple TRPs corresponding to each carrier
606
the PHR of one TRP corresponding to each carrier is reported to the base station, reported content of the PHR of one TRP includes a relevant first power parameter

FIG.6a
