(54) Title: KINETIC VACUUM TREATMENT DEVICES, SYSTEMS, AND METHODS

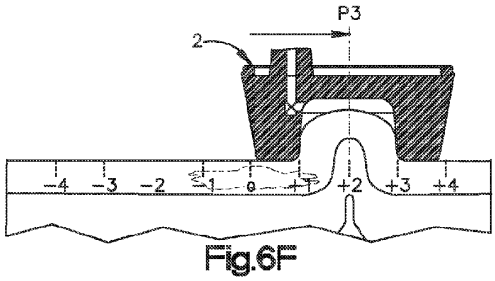

Fig.6F

(57) Abstract: A method of enhancing delivery of an agent into tissue includes placing a housing that defines a chamber adjacent to a surface of the tissue, thereby locating the chamber adjacent to the injection site at which the agent was injected into the tissue, applying vacuum pressure to the chamber, thereby drawing a portion of the tissue through an opening of the chamber and into the chamber, and moving the housing relative to the tissue while the vacuum pressure is applied for enhancing agent delivery in the tissue.
