(54) Title: METHOD AND APPARATUS FOR PREPARING A DIALKYL CARBONATE, AND ITS USE IN THE PREPARA-
TION OF DIARYL CARBONATES AND POLYCARBONATES

(57) Abstract: Unexpected corrosion of downstream sections of a dialkyl carbonate manufacturing apparatus has been traced to alkyl chloroformate impurities, which slowly decompose to yield hydrochloric acid. An improved process and apparatus for dialkyl carbonate synthesis reduce corrosion by physically removing or chemically decomposing the alkyl chloroformate impurities within the corrosion-resistant upstream sections of the apparatus.
