(54) Title: MULTI-MEDIA WIRELESS WATCH

(57) Abstract: A method for interacting with a user through a smart watch can include displaying an interactive image. The method can further include detecting a contact moving continuously from a first edge of the touch-sensitive display toward a second, opposite edge of the touch-sensitive display. In response to the detection, the touch-sensitive display can display select function indicators in accordance with movement of the contact. The select function indicators can comprise four or fewer distinct, selectable icons.
