(54) Title: METHOD AND DEVICE FOR SAVING DATA

(54) 发明名称: 一种保存数据的方法和装置

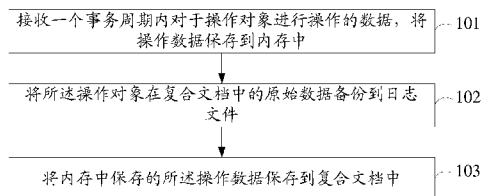

图 1 / FIG. 1

(57) Abstract: A method and a device for saving data are provided, which belong to the field of computer technology. The method includes the following steps: receiving the operation data operating the operation object in a transaction period, and saving the operation data to memory; backing up the original data of said operation object in the compound document to a log file; saving said operation data saved in the memory to said compound document. The device includes: a receiving module, a backing-up module and a saving module. Using the solutions above, the problem of compound document corruption caused by exception in the existing file system is solved; a reliable data storage system is provided for the user.
