

TITLE OF INVENTION : DISPLAY CONTROL APPARATUS, DISPLAY CONTROL METHOD, AND DISPLAY CONTROL PROGRAM

ABSTRACT

5

To provide a display control apparatus, a display control method, and a display control program capable of displaying accurate and stable information related to the movement trajectory of a clubhead.

10 A display control apparatus is equipped with: a captured image acquiring unit 21 that acquires a plurality of captured images of a swing of a golf club; a specific position detecting unit 22 that detects the position of a neck of the golf club included in each of the captured images; a trajectory information generating unit 23 that generates trajectory information of the position of the neck by linking positions of the neck which are detected in each of the captured images in the order that the plurality of captured images are
15 captured; and a display control unit 24 that displays the trajectory information of the position of the neck.
