(54) Title: PROJECT MANAGEMENT SYSTEM AND METHOD

FIG. 1

(57) Abstract: A method for completing a project includes several steps. A request for completing a project is received, including first information regarding the project. At least one person for completing the project is determined based on the first information. Second information regarding the project is also received, and instructions for completing the project are identified based on analysis of the second information. The instructions include a plurality of actions to be performed by the at least one person, including the creation of at least one document using a standardized template. The performance of the actions by the at least one person in completing the project is automatically tracked. A system suitable for performing the method is also disclosed, including a processor, a memory, and several components for performing the steps.
