(54) Title: SYSTEM FOR MEDIATING PREPAYMENT IDENTIFICATION DATA AND METHOD THEREOF

[Fig. 1]

(57) Abstract: A system for relaying prepayment identification data is disclosed. A relay server generates activation information for the identification data of prepaid cash and prepaid cards, the identification data being received from at least one Point-Of-Sale (POS) terminal, and then transmits the issuance results and activation results based on the identification data to the POS terminal. At least one issuance server updates the identification data of the prepaid cash and the activated prepaid cards using the issuance results and the activation results which are received from the relay server.
