(54) Title: CAR JIG AND METHOD FOR ASSEMBLING, TRANSPORTING, AND INSTALLING A CAR FOR AN ELEVATOR

Fig. 1

(57) Abstract: A car jig (20) for assembling, transporting, and installing a car (70) for an elevator is described. The car jig (20) comprises: a rectangular base frame (22) having a top side, a bottom side, and four lateral sides surrounding a free inner space of the base frame (22); a first guide rail (28) arranged on the top side on a first lateral side (24) of the four lateral sides of the base frame (22) such that the first guide rail (28) extends from the base frame (22) in vertical direction; a second guide rail (30) arranged on the top side on a second lateral side (26) of the four lateral sides of the base frame (22) opposite to the first lateral side (24) such that the second guide rail (30) extends from the base frame (22) in vertical direction, wherein the first guide rail (28) and the second guide rail (30) are arranged such that a position of and a distance between the first and second guide rails of the car jig (20) correspond to a position of and, respectively, distance between corresponding guide rails (86, 88) within a hoistway (90) of the elevator; a first carrier
