

ABSTRACT OF THE DISCLOSURE (FIG. 1)

"METHOD AND APPARATUS FOR OPTIMIZING AUTO
GAIN CONTROL OF READ CHANNEL IN A DISK DRIVE"

5

10

There is disclosed a disk drive which can appropriately execute a gain control of an AGC amplifier included in a read channel for each zone on a disk. A CPU refers to table information stored in a memory, and reads initial gain data corresponding to the zone during switching of the zone as a read object. The CPU sets the read initial gain data into the AGC amplifier.
