

A DEVICE FOR EXCHANGING GAMING CHIPS AND CASH CURRENCY

Abstract

5 In an exchange device (1) for gaming chip (G) and cash currency
(C) of the present invention, the gaming chip (G) has a color or
indication of value on its external surface, the exchange device
comprises: a cash currency insertion opening (211); a cash currency
reading section (2160) for obtaining authenticity information and
10 currency information of the cash currency inserted from the cash
currency insertion opening (211); an inserted cash currency amount
display section (232) configured to display the amount of the cash
currency acquired by the cash currency reading section (2160); a
gaming chip storage section (215) configured to store the gaming
15 chips (G) by type; a gaming chip dispensing section (216) configured
to dispense the gaming chips (G) corresponding to the amount of the
cash currency acquired by the cash currency reading section (2160)
from the gaming chip storing section (215); a take-out section (217)
in which the paid out gaming chips (G) are placed; and a user
20 recognition section (22) configured to recognize a person wishing
exchange.
