(54) **Title**: DERMAL DELIVERY

(57) **Abstract**: The present invention describes systems and methods for treating disorders and/or conditions associated with the dermal level of the skin. Such disorders include acne, hyperhidrosis, bromhidrosis, chromhidrosis, rosacea, hair loss, dermal infection, and/or actinic keratosis. Methods generally involve administering nanoemulsions (*e.g.*, nanoparticle compositions) comprising at least one therapeutic agent, such as botulinum toxin. In some embodiments, nanoemulsions are prepared, *e.g.*, by high pressure microfluidization, and comprise a particle size distribution exclusively between 10 nm and 300 nm.
