(54) Title: A TELECOMMUNICATIONS NETWORK AND TELECOMMUNICATIONS DEVICE

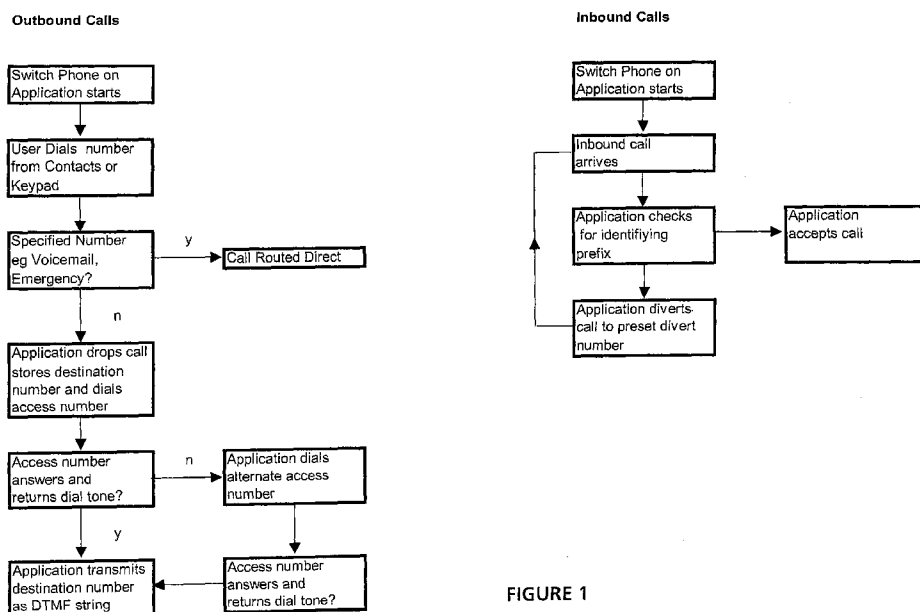

FIGURE 1

(57) Abstract: A telecommunications network comprises a recording system and a telecommunications device (especially a mobile phone) operative to transmit and receive data over the network to/from a second telecommunications device. The telecommunications device is provided with routing means operative to route data transmissions between the telecommunications device and the desired location to the recording system. The recording system is operative to store a copy of the data transmission.
