

METHOD FOR PRODUCING REFINED, BLEACHED, AND DEODORIZED PALM OIL (RBDPO)

Abstract

A method for producing an oil and/or fat aims at providing an oil and/or fat having a reduced content of glycidol and glycidol fatty acid esters. The method includes a contact treatment using an acid during bleaching operation when an oil and/or fat containing glycidol and glycidol fatty acid esters is subjected to bleaching and deodorization.
