

1 **ABSTRACT OF DISCLOSURE**

2 A container includes a base for supporting a flat object, a covering
3 device for covering the flat object on the base and at least one conductive
4 unit in conductive contact with at least one of the base and the covering
5 device. The conductive unit includes at least one conductive column
6 exposed from the container for conductive contact with an external object
7 and at lest one spring for biasing the column into firm contact with the
8 external object as shown in Fig. 2 .
