(54) Title: SYSTEM AND METHOD FOR COMPLIANCE-ENABLED DIGITALLY REPRESENTED ASSETS

Fig. 1

(57) Abstract: A computer-implemented compliance system is provided, configured to manage transactions over a digital asset network according to a compliance policy. The digital asset network is configured to enforce rules governing recording transactions on a public ledger. The compliance system is configured to determine that a requested transaction is in compliance with the compliance policy, generate at least partially encrypted compliance relevant auxiliary information (CRAI), the CRAI comprising information configured to facilitate independent verification of the compliance, and associate at least a portion of the CRAI with transaction information stored on the public ledger and store the associated CRAI in a storage location accessible via the digital asset network.
