(54) Title: VESSELS

(57) Abstract: In a process of construction of a twin-hulled vessel (2) unitary port and starboard outer mono-hulls (4) (or 4') are connected to port and starboard transition sections (6) (or 6'), and two assemblies (4, 6), (or 4', 6') thus formed are connected by the transition sections (6) (or 6') to a generally horizontal continuous structure (14). One way of assembling the multi-hull vessel (2) consists of connecting the respective transition sections (6) (or 6') to the respective outer mono-hulls (4) (or 4') and then lowering the structure (14) onto the transition sections (6) (or 6') and connecting the sections (6) (or 6') to the structure (14).
