WO 2006/002193 A2

(54) Title: PRRSV SUBUNIT VACCINES

(57) Abstract: Vaccines effective against PRRSV include at least one portion of PRRSV ORF1. Such vaccines, upon administration, provoke an immune response in PRRSV-susceptible animals. Moreover, compositions in accordance with the present invention provide immune response up to and including protective immunity against PRRSV as well as reduce the severity of PRRSV and/or incidence of PRRSV. Selected portions of ORF1 can be used singularly, in combination with one another, in combination with other PRRSV ORFs, and in combination with other PRRSV vaccines.
