USER INTERFACE FOR CREATING A SPREADSHEET DATA SUMMARY TABLE

ABSTRACT

A graphical user interface for creating a data summary table includes a field pane including a list of a plurality of fields, and a layout pane including a plurality of zones. The zones represent areas of the data summary table, and the layout pane allows a field of the plurality of fields from the field pane to be added to a first zone of the zones. A data summary table is updated upon the field being added to the layout pane.
