(54) Title: FIZZY FORMULATIONS

(54) Bezeichnung: BRAUSEFORMULIERUNGEN

(57) Abstract

The invention relates to rapidly decomposing forms of administering alkali-sensitive active agents, more particularly selegiline, for oral applications in the form of fizzy formulations, containing an alkali-sensitive active agent and a fizzy base consisting of one or several alkaline earth carbonates, an organically edible acid and/or alkali salt of a citric acid and optionally pharmaceutically usable additives.

(57) Zusammenfassung

Die Erfindung betrifft schnell zerfallende Darreichungsformen für alkali-empfindliche Wirkstoffe, insbesondere Selegilin, zur oralen Anwendung in Form von Brauseformulierungen, welche einen alkali-empfindlichen Wirkstoff und eine Brausegrundlage bestehend aus einem oder mehreren Erdalkalicarbonaten, einer organisch essbaren Säure und/oder einem Alkalisalz der Zitronensäure und gegebenenfalls pharmazeutisch verwendbare Hilfsstoffe enthalten.
