(54) Title: PERSONAL GROOMING DEVICE HANDLE AND METHOD FOR MAKING THE SAME

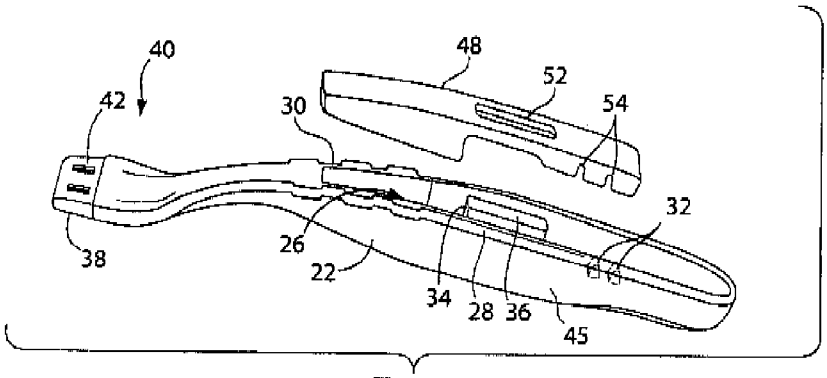

Fig. 2

(57) Abstract: A method of manufacturing a handle (12) for a personal grooming device (10) includes forming a substrate portion (22) of a first material. The substrate portion has first and second walls (28,30) forming a channel (26) extending along a long axis of the substrate portion. An insert member (48) is formed separate from the substrate portion and disposed within the channel. A grip portion (24) of a second material is formed on the substrate portion. The second material substantially encases the insert member.
