CLAIMS

1. Use of a Euglena-derived material in the manufacture of a medicament for preventing or treating one or more diseases selected from a group consisting of influenza, peptic ulcer, and rheumatoid arthritis,

wherein said medicament is an immune balance regulator that regulates an immune balance between Th1, Th2, and Th17, the immune balance being a balance between immune responses individually induced by Th1, Th2, and Th17 in a living body.

2. The use of claim 1, wherein the regulator is to be used as an anti-influenza agent.

3. The use of claim 1, wherein the regulator is to be used as an agent for preventing or treating the peptic ulcer.

4. The use of claim 1, wherein the regulator is to be used to prevent or treat rheumatoid arthritis.

5. The use of claims 1, wherein the Euglena-derived material is paramylon or a processed product therefrom.
