(54) Title: ELECTRODE ASSEMBLY FOR A SOLAR MODULE

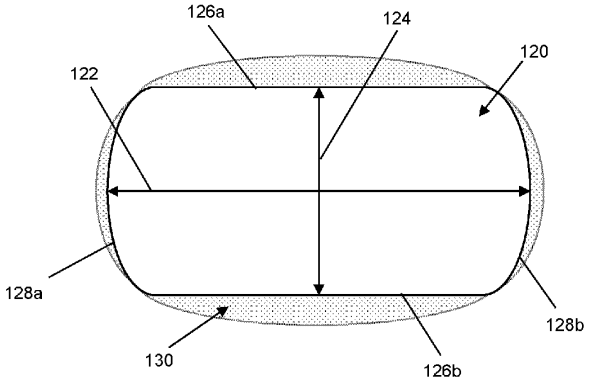

Fig. 5

(57) Abstract: Various embodiments provide an electrode assembly for a solar cell The electrode assembly comprises: an insulating optically transparent film; and a plurality of longitudinally extending, laterally spaced conductive elements arranged parallel to one another on a surface of the film. Each conductive element has a generally rectangular cross-sectional shape, wherein a width of each conductive element is between 0.15 mm and 0.5 mm and a depth of each conductive element is between 0.1 mm and 0.3 mm. The width of each conductive element is greater than the thickness of each conductive element. Other embodiments relate to a solar cell assembly including the electrode assembly, and a solar module including the solar cell assembly.
