(54) Title: METHOD AND SYSTEM FOR DISPLAYING DATA ON A MOBILE TERMINAL

(57) Abstract: The present invention provides a method and system for acquiring, storing and displaying content on a mobile terminal. The mobile terminal is adapted to acquire content from content providing devices or sources such as the Internet, e-mail, or direct download from a PC to the mobile terminal for display. Content providing devices of the system are stand-alone devices which store content, such as location based advertising information, for downloading by a mobile terminal in close proximity to the content providing device. An application resident on the mobile terminal can provide scrolling player functionality to enable stored data content to be easily viewed.
