(54) **Title:** ENCLOSURE TO PREVENT FLUID INGRESS OF A DEVICE HAVING A TOUCH SCREEN INTERFACE

(57) **Abstract:** An electronic device enclosure having an integrated in-mold foil, which prevents fluid ingress around an included display of the electronic device, is disclosed. A portion of the in-mold foil is adapted to the specific contour and profile of the display, thereby allowing a user to use a touch screen interface of the display with no shortcomings. In addition, the in-mold foil protects the display from direct chemical attack, and may provide a liquid-tight seal between a button of the electronic device and the enclosure.
