(54) Title: PORT CONNECTING ASSEMBLIES AND ARRANGEMENTS

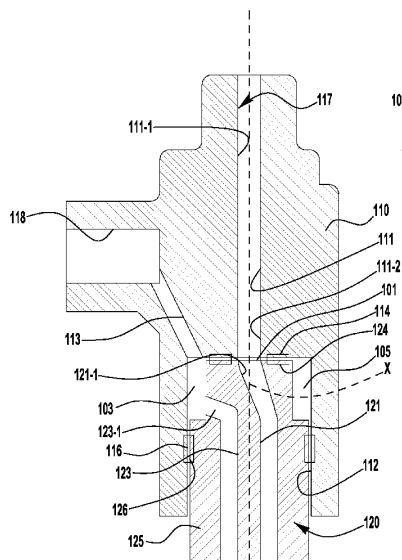

FIG. 1

(57) Abstract: A multiple port connecting assembly 100 includes a connector body 110 and a fluid isolation adapter 120. The connector body 110 includes a first fluid passage 111 extending from an adapter port to a first connector port, a second fluid passage 113 extending from the adapter port to a second connector port, a first seat portion 114 disposed between the first fluid passage and the second fluid passage, and a second seat portion 116 disposed between the second fluid passage and an open end portion of the adapter port. The fluid isolation adapter 120 is removably assembled with the adapter port and includes an adapter body 125 defining a first end passage 121 that connects with the first fluid passage, a second end passage 123 that connects with the second fluid passage, a first seal portion 124 sealing against the first seat portion, and a second seal portion 126 sealing against the second seat portion.
