

ABSTRACT

An object of the present invention is to provide a polyolefin-based resin pellet with less generation of fine powder.

5 The polyolefin-based resin pellet containing: a polyolefin-based resin; an erucic acid amide; and a fatty acid amide having 20 or less carbon atoms, in which a content of the fatty acid amide having 20 or less carbon atoms is 1% to 6% by mass with respect to 100 % by mass of a total amount of the erucic acid amide and the fatty acid amide having 20 or less carbon atoms.
