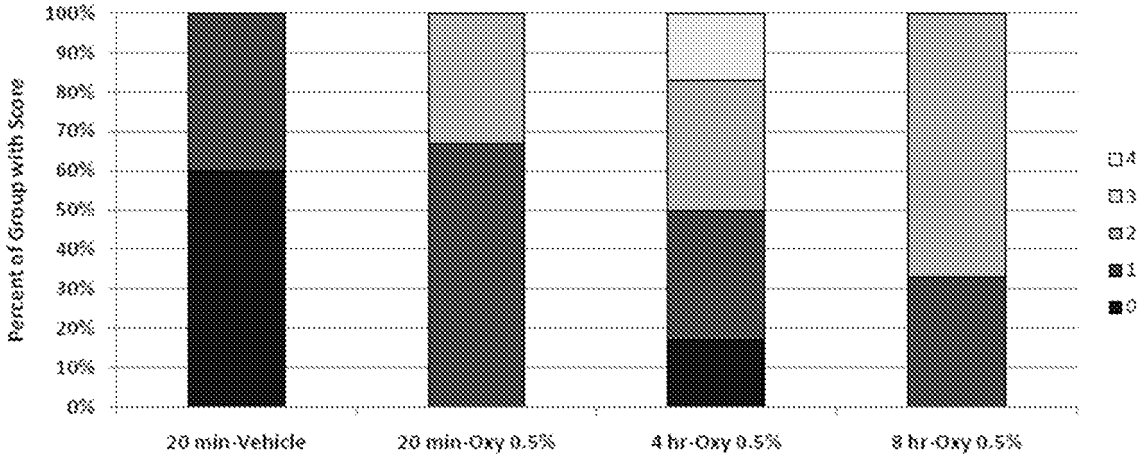

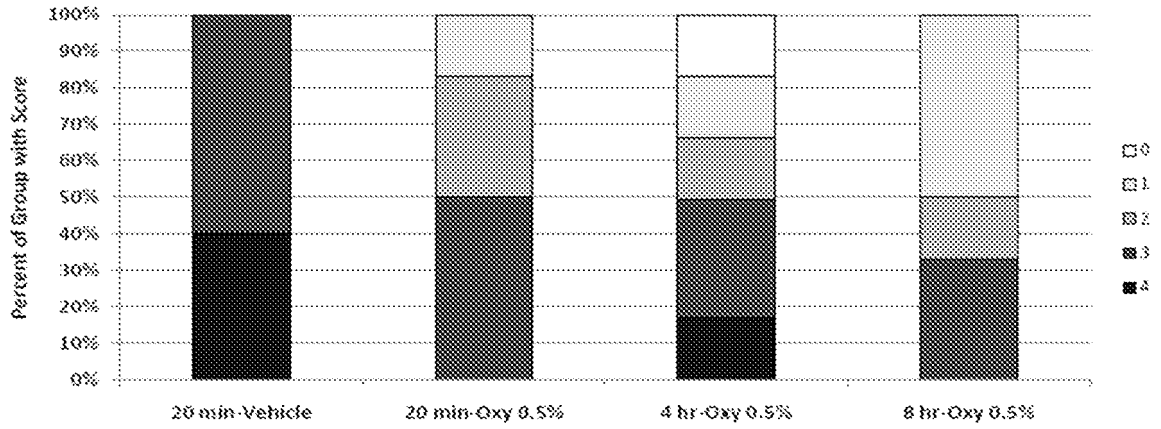

FIG. 1

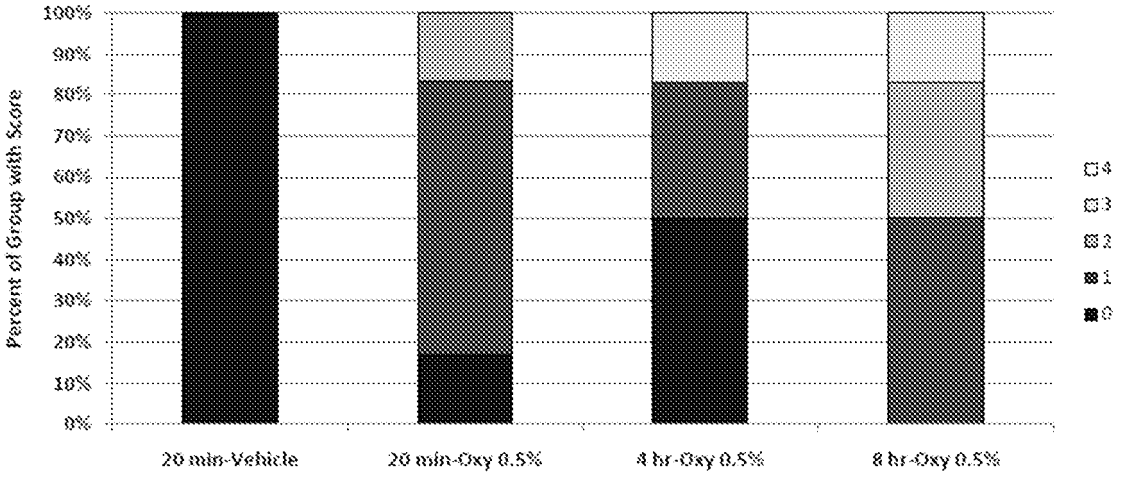

Score	Definition / Criteria
Very Poor	Very poor healing result; majority of epidermis unhealed
Poor	Poor healing result; large amounts of unhealed epidermis
Fair	Fair healing result; multifocal small areas of unhealed epidermis; majority of dermis covered by at least a thin layer or epidermis
Good	Good healing result; all areas healed but with focal areas of lesser quality healing
Excellent	Excellent healing result; all areas well healed

FIG. 2

Score	Definition / Criteria
Very Poor	Majority of epidermis separated from dermis
Poor	Large confluent areas of separation
Fair	Numerous small foci of separation
Good	A few small foci of separation
Excellent	No separation

FIG. 3

Score	Definition / Criteria
Very Poor	No healing; no adaptive hyperplasia
Poor	A few scattered foci where epidermis slightly thickened
Fair	Numerous foci, or a large area where epidermis at least doubled in thickness
Good	Confluent areas with thickened epidermis
Excellent	Majority of section had thickened epidermis

FIG. 4
