DISPOSABLE DIAPER

162162

G00001

A disposable diaper including a pair of elasticized gasket cuffs 12 disposed in transversely opposite sides of the diaper, a pair of elasticized barrier cuffs 9 disposed adjacent the gasket cuffs and a three-dimensional feces receiving section 10 extending at least partially across a crotch region of the diaper wherein the feces receiving section 10 is defined by a pair of elasticized first barrier flaps 5 transversely opposite to and spaced from each other and a pair of elasticized second barrier flaps 6 longitudinally opposed to and spaced each other and extending transversely between the first barrier flaps 5.

Refer to Fig. 1.
