(54) Title: METHOD AND APPARATUS FOR PROVIDING A LOTTERY

Figure 42

(57) Abstract: A process provides a first price category and a second price category in which a lottery ticket can be purchased for a lottery game. The first price category is distinct from the second price category. The first price category corresponds to a first known portion of a linear prize and a first known portion of a non-linear prize associated with the lottery game. Further, the second price category corresponds to a second known portion of a linear prize and a second known portion of a non-linear prize associated with the lottery game. The second known portion of the linear prize is more than the first known portion of the linear prize, the second known portion of the non-linear prize being more than the first known portion of the non-linear prize.
