(54) Title: E-BUSINESS OPERATIONS MEASUREMENTS REPORTING

(57) Abstract: An example of a solution provided here comprises: (a) collecting data from a production environment, utilizing a plurality of probes; (b) performing calculations, regarding availability or response time or both, with at least part of the data; (c) outputting statistics, resulting from the calculations; and (d) performing (a) - (c) above for a plurality of applications, whereby the applications may be compared. Another example comprises: receiving data for a plurality of transaction steps, from a plurality of probes; calculating statistics based on the data; mapping the statistics to at least one threshold value; and outputting a representation of the mapping.
