

GLP-1-Fc-FGF21 Dual-Target Fusion Protein Compositions, Injections, and Uses Thereof

Abstract

A GLP-1-Fc-FGF21 double-target fusion protein composition and the use thereof. The composition comprises a GLP-1-Fc-FGF21 fusion protein and a buffer solution. In the composition, by means of adding the buffer solution, the generation of visible particles can be effectively controlled, and the stability of the GLP-1-Fc-FGF21 fusion protein is improved, so that the shelf life of a product can be prolonged. The composition can be used for treating and/or preventing metabolic diseases, such as diabetes, hyperlipidemia, obesity and diseases related to fatty liver.
