

RECORDING MEDIUM, OPTICAL INFORMATION REPRODUCING APPARATUS
AND SEEK METHOD

ABSTRACT OF THE DISCLOSURE

Reducing problems relating to copy right, reducing a necessity of collecting an optical disk for, for example, rental use and further enabling the optical disk itself to be inhibited from rental use.

A reproducing film whose reflectance is changed by irradiating laser beam having a higher strength than a predetermined one is formed, the depth of a pre-pit in a data section is set to less than a quarter of the wavelength of a laser beam and the reproducing film is composed such that its reflectance drops if it is irradiated by a laser beam having a higher strength than a predetermined level.

(No Suitable Figure)
