(54) Title: METHOD FOR RECLAIMING LAND

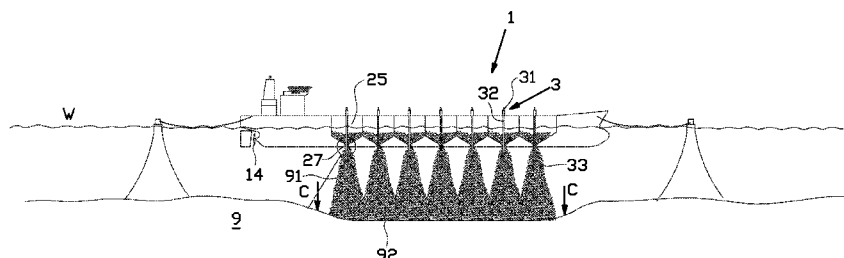

FIG. 4D

(57) Abstract: Method for reclaiming land at a location of land reclamation using a supply vessel, a transport vessel (1) and a delivery vessel, wherein the transport vessel (1) is provided with a hull and at least a hopper (25) for containing dredged material, wherein the at least one hopper (25) is provided with a chute (27) extending through the bottom of the hull, wherein the method comprises by means of the supply vessel reclaiming dredged material from a submarine seabed, from the supply vessel transferring the dredged material to the at least one hopper (25) of the transport vessel (1), by means of the transport vessel (1) transporting the dredged material stored in the hopper (25) to a depot situated further away, and via the chute dumping the dredged material in the depot.
