

ABSTRACT

ESCAPE INSTALLATION

5

An escaping installation includes a winding unit to wind and rewind a cable, and an escaping gear; a telescopic arm to allow the escaper keeping safe distance from the wall; the escaping gear includes a descender and a safety belt; the descender allows the
10 escaper to descend at a reduced speed in conjunction with the cable adapted with a manual brake; the safety belt allows the escaper to fast wear the belt adapted to the descender to escape from the scene of disaster.
