(54) Title: DISTRIBUTION SYSTEM, SEMICONDUCTOR MEMORY CARD, RECEIVING APPARATUS, COMPUTER-READABLE RECORDING MEDIUM AND RECEIVING METHOD

(57) Abstract: A distribution server (103) distributes a content via a network, and a KIOSK terminal (105) receives the content via the network and records the content in an SD memory card (100). A customer device (111) receives a content via the SD memory card (100), checks out the content and records a copy on a recording medium. SD-Audio players (122 to 124) receive a copy of the content and play back the copy. Here, the KIOSK terminal (105) records a Usage Rule that certifies the right to control recording of content on the SD memory card (100). Move Control Information showing the number of times that moving of rights is permitted is set in the Usage Rule.
