(54) Title: STONE-WOOD COMPOSITE BASE ENGINEERED FLOORING

(57) Abstract: A stone-wood composite base engineered wood flooring having a stone- wood composite base layer in which at least one mesh layer is embedded. Adhered to the base layer is a wood veneer layer. Interlocking design such as tongue-and-groove is provided on at least two sides of the engineered flooring. The wood veneer layer of the engineered wood flooring has improved fire-proof performance, waterproof performance and moisture-proof performance. When the pieces of flooring are bonded to either each other or the floor, undesired warping of joints is consequently minimized.
