

NATURAL BEVERAGE COMPOSITION CONTAINING ARQIAT EXTRACT FREE FROM CAFFEINE AND PHOSPHORIC ACID

ABSTRACT

The present invention provides a novel herbal based beverage composition comprising a herbal distillates (Arqiat) extracted from natural herbs like rose, sandal, khas and ushna, water, at least one sweetener, at least one acidulant, a colorant, a preservative, a stabilizing agent and a flavoring agent, wherein the beverage composition is free from caffeine and phosphoric acid. The invention further provides a method for preparing the natural beverage composition comprising the steps of: dissolving the sugar in herbal distillates (Arqiat) extract of herbs (rose, sandal, khas and ushna) with acidity regulator (buffer) and preservative; heating and stirring the mixture to dissolve all the ingredients until the temperature reaches in range of 70 °C to 75 °C, transferring the syrup into the cooking pans and cooked it at boiling to adjust the Bricks. Stop heating when boil and add sweetener and color in the syrup followed by filtering and cooling the syrup. Dilute the unflavored syrup with treated water to make the finish syrup up to volume and add flavor and stabilizer in the prepared syrup and testing the resultant beverage for pH, Brix and acidity tests, and filling the prepared beverage into the final container through carbo cooler.
