

Abstract:

OIL SEPARATING METHOD

Disclosed is an oil separating method in which oil-
contaminated water in a separation tank is mixed with air
5 bubbles in a bubble-generating apparatus provided at the
bottom of the separation tank to jet out said air-water
mixture into the separation tank,

wherein a surfactant and/or an antifoamer are(is)
previously added to the oil-contaminated water.

Figure 3 - is to accompany the abstract when published.
