(54) Title: METHOD, SYSTEM AND TERMINAL FOR DATA NETWORKS WITH DISTRIBUTED CACHES

(57) Abstract: The present invention provides a method of accessing data on a network from a user terminal having a local store and wherein the network is accessed via a service provider, comprising: requesting data; determining whether the requested data is available from the local store and if the data is not available from the local store requesting the requested data from the service provider; and receiving, at the local store, a selection of data from the service provider.
