

ABSTRACT

The present application relates to a high-voltage winding (130), comprising a winding body (1310), a high-voltage coil (1320) and a high-voltage insulating layer (1330). A wire is wound on the winding body (1310) to form the high-voltage coil (1320), and the high-voltage insulating layer (1330) wraps the high-voltage coil (1320) and the winding body (1310). The present application further relates to a method for preparing the high-voltage winding.
