

LAYOUT CREATION DEVICE, LAYOUT CREATION METHOD, LEARNING MODEL GENERATION DEVICE, AND LEARNING MODEL GENERATION METHOD

ABSTRACT

A layout creation device is configured to include a position data acquiring unit (2) to acquire position data indicating an installation position of an electrical appliance installed in a space, and a layout creating unit (3) to create layout data indicating a layout of the electrical appliance for the space by giving the position data and usage condition data indicating a usage condition of the electrical appliance to a learning model (4).
