

CLAIMS

1. Packaging (1) for medical devices, comprising a tub (2) provided with a peripheral wall (21) delimiting an upper opening (4), a sealing cover (5) sealable on the upper opening of the tub, and a sealing film (6) adapted to be positioned on the upper face of the sealing cover,

the packaging being characterized in that the sealing film (6) comprises:

- a protective foil (7),
- an adhesive layer (8) extending over the protective foil,
- a peelable sheet (9) having a first portion (10) extending over the adhesive layer (8) opposite to a first portion (11) of the protective foil,

wherein said first portions (10, 11) of the protective foil (7) and peelable sheet (9) are arranged in a retracted position uncovering the sealing cover (5),

wherein a second portion (12) of the protective foil, distinct from the first portion (11), is bonded to the sealing cover (5) and/or to the tub (2) by the adhesive layer (8), and a second portion (13) of the peelable sheet, separated from said second portion (12) of the protective foil, is arranged so as to be pullable by a user to progressively separate the first portion (11) of the peelable sheet from the first portion of the protective foil to an extended position wherein the protective foil adheres to the sealing cover.

2. Packaging (1) according to claim 1, wherein the first portions (10, 11) of the protective foil (7) and peelable sheet (9) are rolled around themselves in the retracted position.

3. Packaging (1) according to claim 1 or claim 2, wherein the second portion (12) of the protective foil (7) that is bonded to the sealing cover (5) and/or to the tub (2) is attached to a first wall (21d) of the peripheral wall (21) of the tub (2), and the first portion (11) of the protective foil (7) contacts a second wall (21c) of the peripheral wall of the tub (2), opposite to the first wall (21d) relative to the upper opening (4), when said first portion (11) is in the extended position, thereby covering the upper opening (4).

4. Packaging (1) according to any of the preceding claims, wherein the second portion (12) of the protective foil (7) that is bonded to the sealing cover (5) and/or to the tub (2) by the adhesive layer (8) is attached to a flange (16) of the tub via the adhesive layer (8).

5. Packaging (1) according to claim 4, wherein the second portion (12) of the protective foil (7) is attached to a top side (17) of the flange (16) of the tub (2).

5 6. Packaging (1) according to claim 5, wherein the top side (17) of the flange (16) is left uncovered by the sealing cover (5), and the second portion (12) of the protective foil (7) attached to a top side (17) of the flange (16) is attached to said flange (16) via the adhesive layer (8).

10 7. Packaging (1) according to claim 5, wherein the top side (17) of the flange (16) is covered by the sealing cover (5), and the second portion (12) of the protective foil (7) attached to a top side (17) of the flange (16) is attached to the sealing cover (5) via the adhesive layer (8).

8. Packaging (1) according to claim 4, wherein the second portion (12) of the protective foil (7) is attached to a bottom side (18) of the flange (16) of the tub (2).

15 9. Packaging (1) according to any of the preceding claims, wherein the first portions (10, 11) of the protective foil (7) and peelable sheet (9) arranged in a retracted position form a retracted structure that is located below the flange (16) of the tub (2), near the bottom side (18) of the flange (16).

20 10. Packaging (1) according to any of the preceding claims, wherein the second portion (13) of the peelable sheet (9) comprises a tab.

25 11. Packaging (1) according to any of the preceding claims, wherein the protective foil (7) comprises one or more layers selected from the group consisting of a metallic layer such as an aluminum layer, a plastic layer such as PE, PET, and a paper layer.
