(54) Title: A SYSTEM AND METHOD FOR SUPPORTING MULTIPLE VENDOR TELEPHONY HARDWARE ON A COMPUTING PLATFORM

(57) Abstract: A system and method for supporting multiple vendor telephony hardware (telephone) on a computing platform. By supporting multiple vendors, many network interfaces from PSTN to Packet-Based voice can be seamlessly integrated. Within the present invention a client-server model (PC, Telephone Server) is defined where client applications use a collection of hardware resources.
