

Title of Invention:

CARBONATED BEVERAGE, METHOD FOR PREPARING FLAVOR
COMPOSITION, AND METHOD FOR SUPPRESSING EFFERVESCENCE OF
CARBONATED BEVERAGE

5

Abstract

The present invention provides a carbonated beverage suppressed in spilling-out over
during production or upon opening, a carbonated beverage flavor composition that
suppresses spilling-out, and a method for suppressing spilling-out. The present invention
10 relates to a carbonated beverage containing 1-160 ppm of a flavor component having a
Log P of 2.8-8, a flavor composition containing a flavor component having a Log P of
2.8-8, and a method for suppressing effervescence of a carbonated beverage, the method
comprising adjusting the content of a flavor component having a Log P of 2.8-8 in the
carbonated beverage to 1-160 ppm.
