FORMULATION CONTAINING DIHYDROPYRIDAZINE-3,5-DIONE DERIVATIVE

ABSTRACT

The present invention provides a pharmaceutical composition having excellent dissolution property and content uniformity and a production method thereof by mixing a p-toluenesulfonate of 7-[[2,3-difluoro-4-[2-[2-methoxyethyl(methyl)amino]ethoxy]phenyl]methyl]-10-hydroxy-6-methyl-8-oxo-N-[4-(trifluoromethyl)-2-[6-(trifluoromethyl)pyrimidin-4-yl]phenyl]-6,7-diazaspiro[4,5]deca-9-ene-9-carboxamide with specific additives, and formulating the mixture.
