ABSTRACT

FOOD CONTAINER FOR ATTACHMENT TO BEVERAGE CONTAINERS

A food container for attachment to a rim of an open beverage container, the food container having a base, and at least one side wall extending upwardly from a periphery of the base, the base having an outer lower surface; the outer lower surface having thereon an attachment for releasably attaching the food container to the bead of the beverage container whilst allowing a straw to be able to be inserted into the open beverage container.
