METHODS OF TREATING NERVE AGENT-INDUCED SEIZURES

ABSTRACT

The present disclosure relates to methods of treating a disease (*e.g.*, a seizure) in a subject in need thereof, comprising administering to the subject a therapeutically effective amount of tezampanel, a pharmaceutically acceptable salt thereof, or a prodrug thereof, alone or in combination with a therapeutically effective amount of a benzodiazepine, a pharmaceutically acceptable salt thereof, or a prodrug thereof.
